PROFESSIONAL SUMMARY

Frontend Developer with hands-on professional experience building ERP web applications using HTML, CSS, JavaScript, and Django. Experienced in developing UI components, working with Django views and URL routing, and testing and debugging application logic across MySQL and PostgreSQL databases. Seeking to grow into a Junior Full Stack Developer role while continuing to build practical, real-world software.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript

Backend: Python, Django

Databases: MySQL, PostgreSQL

Tools: Git/GitHub, VS Code

PROFESSIONAL EXPERIENCE

Frontend Developer

May 2026 – August 2026

Mahe Software Solutions

- Build and maintain UI components for the Saasublimation ERP platform, translating business requirements into functional web pages using HTML, CSS, and JavaScript.
- Work on the Task, Follow-up, and Tracking modules, handling frontend logic and backend conditions through Django views.py and urls.py.
- Test application flow to identify and fix bugs related to incorrect data storage and business logic.
- Work with MySQL and PostgreSQL databases to manage and troubleshoot application data.

Frontend Developer Intern

Jan 2026 – Apr 2026

Mahe Software Solutions

- Learned Django fundamentals, including models, views, URLs, and templates, while contributing to a live ERP project under senior developers.
- Built and modified web pages using HTML, CSS, and JavaScript as part of the Saasublimation platform team.
- Gained hands-on experience in testing, debugging, and basic database operations.

PROJECTS

Event Booking Platform | HTML, CSS, JavaScript, Django, MySQL

- Developing a web application for discovering, searching, and booking events, including event listings, ticket selection, and checkout.
- Building responsive frontend pages for event details, ticket selection, and booking confirmation.
- Implementing search, category filtering, and form validation using JavaScript.
- Designing Django backend logic and a MySQL database structure to manage users, events, tickets, and bookings.

Students Voice and Support System | HTML, CSS, JavaScript, Django

- Developing a web application for students to submit feedback, concerns, and suggestions through a structured interface.
- Building the frontend using HTML and CSS, with JavaScript for form validation and interactivity.
- Designing Django-based backend logic to store and track student concerns and support requests.

EDUCATION

B.E. Computer Science and Engineering — Vivekanandha College of Technology for Women

2022 – 2026

81%

12th Standard — Government Model Girls Higher Secondary School

2022

78.33%
